

WORKSHOP CLUTCH AND THROTTLE CABLE KIT

This kit combines the clutch and the throttle kit in handy storage box. Typical application: motorcycle clutch cables, throttle cables and choke cables. Supplied with 10m of conduit, with a black PVC cover, 10m of low friction liner and 10m of inner wire.

A range of nipples and high quality fittings are also included. The ferrules and bends are a snug fit on the conduit. They can be bonded in place during the assembly, or crimped / retained with a small centre punch indentation to their side. The fittings can be adapted for a range of models. There are enough fittings in the kit to make at least ten lines (5 clutch and 5 throttle). Additional fittings, conduit and wire can be purchased separately as required. You will need a basic soldering kit to solder the nipples in place. We recommend our 'bird caging' tool to make the bond with the nipples stronger prior to soldering. Part no. VT13
